ENUMERATION METHOD FOR THE LINK CLOCK RATE AND THE PIXEL/AUDIO CLOCK RATE

ABSTRACT OF THE DISCLOSURE

[0083]   An enumeration method for the link rate and a pixel/audio clock rate. The method can be performed by expressing the pixel/audio clock rate and the link rate with four parameters, A, B, C, and D based upon a master frequency 23.76GHz as $2^{10} \times 33 \times 57 \times 111$ Hz, and regenerating a pixel/audio clock from the link clock.
